Bilaga 3B - Exkluderade studier

Studier som efter fulltextgranskning ej uppfyllt inklusionskriterierna och således inte ligger till grund för evidensbaserade resultat.

Kapitel 3.1

Anton S, Han H, Bray G, Sacks F, Williamson D. Demographic and macronutrient diet characteristics influence adherence to calorie restricted diets: Findings from the pounds lost trial. SOURCE Obesity

Bourn DM, Mann JI, McSkimming BJ, Waldron MA, Wishart JD. Impaired glucose tolerance and NIDDM: Does a lifestyle intervention program have an effect? Diabetes Care 1994;17:1311-1319.

Camhi SM, Stefanick ML, Katzmanyk PT, Young DR. Metabolic syndrome and changes in body fat from a low-fat diet and/or exercise randomized control trial. Obesity;18:548-554.

de Souza RJ, Bray GA, Carey VJ, Hall KD, LeBoff MS, Loria CM, et al. Effects of 4 weight-loss diets differing in fat, protein, and carbohydrate on fat mass, lean mass, visceral adipose tissue, and hepatic

Howarth NC, Murphy SP, Wilkens LR, Hankin JH, Kolonel LN. Dietary energy density is associated with overweight status among 5 ethnic groups in the multiethnic cohort study. J Nutr 2006;136:2243-8.

Iqbal SI, Helge JW, Heitmann BL. Do energy density and dietary fiber influence subsequent 5-year weight changes in adult men and women? Obesity (Silver Spring) 2006;14:106-14.

Josse AR, Atkinson SA, Tarnopolsky MA, Phillips SM. Diets higher in dairy foods and dietary protein support bone health during diet- and exercise-induced weight loss in overweight and obese

Klein S. Clinical Trial Experience with Fat-Restricted vs. Carbohydrate-Restricted Weight-Loss Diets. Obesity Research 2004;12:141S-144S.

Mann JI, Appleby PN, Key TJ, Thorogood M. Dietary determinants of ischaemic heart disease in health conscious individuals. Heart 1997;78:450-5.

McManus K, Antinoro L, Sacks F. A randomized controlled trial of a moderate-fat, low-energy diet compared with a low fat, low-energy diet for weight loss in overweight adults. Int J Obes Relat Metab

Mikkila V, Rasanen L, Raitakari OT, Pietinen P, Viikari J. Longitudinal changes in diet from childhood into adulthood with respect to risk of cardiovascular diseases: The Cardiovascular Risk in Young Finns

Moretti L, Canada T. A randomized study comparing the effects of a low-carbohydrate diet and a conventional diet on lipoprotein subfractions and C-reactive protein levels in patients with severe obesity: Commentary. Nutrition in Clinical Practice 2006;21:187-188.

Pascale RW, Wing RR, Butler BA, Mullen M, Bononi P. Effects of a behavioral weight loss program stressing calorie restriction versus calorie plus fat restriction in obese individuals with NIDDM or a

Raynor HA, Jeffery RW, Ruggiero AM, Clark JM, Delahanty LM. Weight loss strategies associated with BMI in overweight adults with type 2 diabetes at entry into the Look AHEAD (Action for Health in Diabetes) trial. Diabetes Care 2008;31:1299-304.

Diabetes Care 2003;26:2288-93.

Tzima N, Pitsavos C, Panagiotakos DB, Skoumas J, Zampelas A, Chrysohoou C, et al. Mediterranean diet and insulin sensitivity, lipid profile and blood pressure levels, in overweight and obese people;
the Attica study. Lipids Health Dis 2007;6:22.

Westman EC, Samaha FF. Trial finds low carb diets reduce weight more than low fat diets in the short term, but have more minor adverse effects. Evidence-based Cardiovascular Medicine 2004;8:374-377.

Westman EC, Yancy WS, Jr., Olsen MK, Dudley T, Guyton JR. Effect of a low-carbohydrate, ketogenic diet program compared to a low-fat diet on fasting lipoprotein subclasses. Int J Cardiol 2006;110:212-6.

Willett WC. Dietary fat plays a major role in obesity: No. Obesity Reviews 2002;3:59-68.

Wolever TM, Gibbs AL, Mehling C, Chiasson JL, Connelly PW, Josse RG, et al. The Canadian Trial of Carbohydrates in Diabetes (CCD), a 1-y controlled trial of low-glycemic-index dietary carbohydrate in type 2 diabetes: no effect on glycated hemoglobin but reduction in C-reactive protein. American

Kapitel 3.2

Insulin-like growth factor 1 (IGF1), IGF binding protein 3 (IGFBP3), and breast cancer risk: Pooled individual data analysis of 17 prospective studies. The Lancet Oncology 2010;11:530-542.

Bourn DM, Mann JI, McSkimming BJ, Waldron MA, Wishart JD. Impaired glucose tolerance and NIDDM: Does a lifestyle intervention program have an effect? Diabetes Care 1994;17:1311-1319.

Corbett Jr EC. Altering the glycaemic index or carbohydrate intake did not affect glycaemic control in type 2 diabetes: Commentary. Evidence-Based Medicine 2008;13:107.

Corbett Jr EC. 6-Month treatment with a low-glycaemic diet was better than a high-fibre diet for glycaemic control in type 2 diabetes. Evidence-Based Medicine 2009;14:72.

Field AE, Willett WC, Lissner L, Colditz GA. Dietary fat and weight gain among women in the Nurses' Health Study. Obesity (Silver Spring) 2007;15:967-76.

Fraser GE. Vegetarian diets: what do we know of their effects on common chronic diseases? Am J Clin Nutr 2009;89:1607S-1612S.

Gonzalez CA, Riboli E. Diet and cancer prevention: where we are, where we are going. Nutr Cancer 2006;56:225-31.

Gunther AL, Remer T, Kroke A, Buyken AE. Early protein intake and later obesity risk: which protein sources at which time points throughout infancy and childhood are important for body mass index and body fat percentage at 7 y of age? Am J Clin Nutr 2007;86:1765-72.

Hailu A, Knutsen SF, Fraser GE. Associations between meat consumption and the prevalence of degenerative arthritis and soft tissue disorders in the adventist health study, California U.S.A. J Nutr Health Aging. 2006;10:7-14.

Howard BV, Abbott WG, Swinburn BA. Evaluation of metabolic effects of substitution of complex carbohydrates for saturated fat in individuals with obesity and NIDDM. Diabetes Care 1991;14:786-95.

Howarth NC, Murphy SP, Wilkins LR, Hankin JH, Kolonel LN. Dietary energy density is associated with overweight status among 5 ethnic groups in the multiethnic cohort study. J Nutr 2006;136:2243-8.

Jacobs DR, Pereira MA, Meyer KA, Kushi LH. Fiber from whole grains, but not refined grains, is inversely associated with all-cause mortality in older women: the Iowa women’s health study. J Am Coll Nutr 2000;19:326S-330S.

Keim NL, Van Loan MD, Horn WF, Barbieri TF, Mayclin PL. Weight loss is greater with consumption of large morning meals and fat- free mass is preserved with large evening meals in women on a controlled weight reduction regimen. Journal of Nutrition 1997;127:75-82.

Klein S. Clinical Trial Experience with Fat-Restricted vs. Carbohydrate-Restricted Weight-Loss Diets. Obesity Research 2004;12:141S-144S.

Mai XM, Becker AB, Sellers EA, Liem JJ, Kozyrskyj AL. Infrequent milk consumption plus being overweight may have great risk for asthma in girls. Allergy 2007;62:1295-301.

Mann JI, Appleby PN, Key TJ, Thorogood M. Dietary determinants of ischaemic heart disease in health conscious individuals. Heart 1997;78:450-5.

Messier SP. Knee strengthening exercises at home, but not dietary intervention, reduce knee pain and improve knee function in overweight and obese people over 2 years. Evidence-Based Medicine 2010;15:21-22.

Millen BE, Quatromoni PA. Nutritional research within the Framingham Heart Study. J Nutr Health Aging 2001;5:139-43.

Moretti L, Canada T. A randomized study comparing the effects of a low-carbohydrate diet and a conventional diet on lipoprotein subfractions and C-reactive protein levels in patients with severe obesity: Commentary. Nutrition in Clinical Practice 2006;21:187-188.

Mosdol A, Witte DR, Frost G, Marmot MG, Brunner EJ. Dietary glycemic index and glycemic load are associated with high-density-lipoprotein cholesterol at baseline but not with increased risk of diabetes in the Whitehall II study. Am J Clin Nutr 2007;86:988-94.

Padwal R. The Atkins diet led to more weight loss than the Zone diet in overweight and obese premenopausal women at 12 months. Evidence-Based Medicine 2007;12:138.

Savage JS, Birch LL. Patterns of weight control strategies predict differences in women’s 4-year weight gain. Obesity (Silver Spring) 2010;18:513-20.

Schroder KE. Effects of fruit consumption on body mass index and weight loss in a sample of overweight and obese dieters enrolled in a weight-loss intervention trial. Nutrition 2009;26:727-34.

Schroder KE. Effects of fruit consumption on body mass index and weight loss in a sample of overweight and obese dieters enrolled in a weight-loss intervention trial. Nutrition 2010;26:727-34.

Westman EC, Samaha FF. Trial finds low carb diets reduce weight more than low fat diets in the short term, but have more minor adverse effects. Evidence-based Cardiovascular Medicine 2004;8:374-377.

Willett WC. Dietary fat plays a major role in obesity: No. Obesity Reviews 2002;3:59-68.

Yau WY, Hankey GJ. Which dietary and lifestyle behaviours may be important in the aetiology (and prevention) of stroke? J Clin Neurosci. 2011;18:76-80.

Ziegler RG, Subar AF, Craft NE, Ursin G, Patterson BH, Graubard BI. Does beta-carotene explain why reduced cancer risk is associated with vegetable and fruit intake? Cancer Res 1992;52:2060s-2066s.

Kapitel 3.3

Grove KA, Lamb JD. Laboratory, epidemiological, and human intervention studies show that tea (Camellia sinensis) may be useful in the prevention of obesity. Journal of Nutrition 2010;140:446-453.

Kuriyama S. The relation between green tea consumption and cardiovascular disease as evidenced by epidemiological studies. J Nutr 2008;138:1548S-1553S.

Mai XM, Becker AB, Sellers EA, Liem JJ, Kozyrskyj AL. Infrequent milk consumption plus being overweight may have great risk for asthma in girls. Allergy 2007;62:1295-301.

Muckelbauer R, Libuda L, Clausen K, Toschke AM, Reinehr T, Kersting M. Immigrational background affects the effectiveness of a school-based overweight prevention program promoting water consumption. Obesity (Silver Spring) 2010;18:528-34.

Salinardi TC, Rubin KH, Black RM, St-Onge MP. Coffee mannoooligosaccharides, consumed as part of a free-living, weight-maintaining diet, increase the proportional reduction in body volume in overweight men. J Nutr 2010;140:1943-8.

Schroder KE. Effects of fruit consumption on body mass index and weight loss in a sample of overweight and obese dieters enrolled in a weight-loss intervention trial. Nutrition 2010;26:727-34.

Williams PT. The relationships of vigorous exercise, alcohol, and adiposity to low and high high-density lipoprotein-cholesterol levels. Metabolism. 2004;53:700-9.

Kapitel 3.4

He FJ, MacGregor GA. Reducing population salt intake worldwide: from evidence to implementation. Prog Cardiovasc Dis 2010;52:363-82.

Kapitel 5

Kostnads-effektivitet

## Samband BMI/Vikt
