

Bilaga till rapport

Behandling och bedömning i rätts-
psykiatrisk vård, en kartläggning
av systematiska översikter nr 264
(2017)

**Appendix 3 Excluded articles/Bilaga 3 Exkluderade
artiklar**

AMSTAR-formuläret har 11 frågor av varierande dignitet om hur översikterna som granskas har utförts och vad som redovisas i dem. De vanligaste skälen att en översikt exkluderades på grund av låg kvalitet var att den inte uppnådde något eller flera av följande tre kriterier:

AMSTAR 2: Gjordes studieurval och dataextraktion av två oberoende granskare? (Minst två oberoende granskare ska ha utfört studieurvalet och ett konsensusförfarande bör vara definierat för att lösa oenigheter.)

AMSTAR 3: Var litteratursökningen av tillfredsställande omfattning? (Sökningen bör göras i minst två elektroniska databaser. Översikten ska ange de årtal och databaser som ingår (t.ex. Central, Embase och Medline). Ämnesord (keywords) och/eller MeSH-termer ska anges och i tillämpliga fall sökstrategin. Alla sökningar bör kompletteras med genomgång av översiktsartiklar, läroböcker, aktuella innehållsförteckningar, ämnesspecifika databaser och register eller rådfrågning av experter, samt av referenslistorna i de framtagna studierna.)

AMSTAR 7: Har den vetenskapliga kvaliteten hos de ingående studierna utvärderats och dokumenterats? (Förutbestämda metoder för kvalitetsvärderingen ska anges. För effektstudier bör exempelvis framgå om författarna valt att bara ta med randomiserade, dubbelblindade studier med kontrollgrupper som får placebo. För andra studietyper gäller andra ställningstaganden.)

Referens/reference	Orsak till exkludering/ reason for exclusion
Abracen, J., Looman, J., & Langton, C. M. (2008). Treatment of sexual offenders with psychopathic traits: recent research developments and clinical implications. <i>Trauma, Violence & Abuse, 9</i> (3), 144-166.	Låg kvalitet/ low quality
